THE REGENTS OF THE UNIVERSITY OF KANSAS

DECEMBER 1902.

Entered at the Post-office as Second-class Matter.

ANNOUNCEMENT.

For ten years the University of Kansas has maintained the *Kansas University Quarterly*, a journal devoted to the publication of the results of research by members of the University of Kansas. At the opening of the second decade of the journal's existence it has been thought best to begin a new series, with some important changes in the name, manner and time of publication. It has been decided to abandon the quarterly form of issue, and instead to publish the separate papers as soon as they are ready for the printer. By this means the results of research will be more promptly given to the public, and in a form more satisfactory both to the authors and subscribers.

Hereafter this journal will be called the *Kansas University Science Bulletin*, and will be issued at irregular intervals. Each volume will contain from 300 to 400 pages of reading-matter, with the necessary illustrations; and approximately one volume a year will be issued. The amount of scientific matter thus published will be not less, and probably more, than that formerly appearing in four issues of the *Quarterly*. The subscription price will be hereafter $3 per volume; the price of each part will vary with the cost of publication. We hope our present large exchange list will remain intact, and new exchanges are solicited. All exchanges should be addressed to the Library of the University of Kansas.

Communications should be addressed to

H. B. Newson,
Managing Editor of Science Bulletin,
Lawrence, Kan.
